Summary

Full-stack developer with proven experience building production-ready web applications. Delivered a complete freelancing platform with authentication and messaging using React 19, PHP, and MySQL. Skilled in architecting scalable SPAs, designing RESTful APIs, and shipping user-focused features from concept to deployment.

Education

University of Helwan   2024 – Present

Faculty of Computer Science and Artificial Intelligence

- Related Coursework: Software Engineering, Programming, Database Systems

Projects

Freelancing platform - JavaScript, React, PHP, MySQL   [GitHub](#)

- Led the end-to-end development of the platform, from system design and database modeling to frontend UX and backend API implementation
- Architected and deployed a full-stack freelancing platform supporting 3 user roles (Admin, Client, Freelancer) with authentication, role-based permissions, and admin moderation tools for job approval workflows
- Engineered bidding system enabling freelancers to submit proposals and clients to accept or reject bids, reducing proposal-to-hire friction through automated status notifications
- Built live messaging system with 3-second polling for message updates, enabling client-freelancer communication
- Designed RESTful API with PHP Slim Framework following MVC architecture and PSR-11 dependency injection, serving 30+ endpoints with modular controllers for improved code maintainability and testability
- Built a responsive React 19 SPA with Vite and React Router, focusing on smooth navigation, form validation with Zod, and clear user feedback via toast notifications

Personal Portfolio — *TypeScript, Next.js, Tailwind, Motion*   *[Github](#) — [Website](#)*

- Built a static site architecture (SSG) with Next.js App Router and React 19
- Architected a cohesive design system leveraging the Geist and Playfair Display fonts, building a visually striking monochrome color palette from foundation to final UI
- Implemented fluid Framer Motion scroll-triggered animations and staggered mount effects for a polished user experience without sacrificing performance

Certifications

DEPI - React Frontend Engineer Trainee (Present)

Developing real-world React applications

ITI - UIUX Summer Camp

Conducted user research, created wireframes, and delivered interface designs.

Skills

Languages: JavaScript, TypeScript, Python, PHP
Frontend: React 19, Vite, React Router, CSS, Responsive Design, Zod
Backend: PHP (Slim Framework), RESTful APIs, MVC Architecture
Databases: MongoDB, MySQL, PostgreSQL
Tools & Other: Git, GitHub
